

Carbon Footprint for Organization Policy

AddTech Hub Public Company Limited has established a Carbon Footprint for Organization (CFO) policy to assess the amount of greenhouse gas emission and absorption within the organization. This initiative aims to guide the Company towards reducing its greenhouse gas emission in the future.

1. Objectives

To evaluate the greenhouse gas emission resulting from the Company's operations and activities, utilizing this assessment as a tool for calculating emission. This will lead to the development of effective management strategies for reducing greenhouse gas emission. Additionally, it will prepare employees to understand and report the organization's greenhouse gas emission and absorption (Greenhouse Gas Reporting) in the future.

2. Scope

This policy applies to all operating procedures related to the Company by evaluating and collecting the amount of greenhouse gas emission and absorption that occur under the organization's control and operations. (Operation Control Approach)

3. Scope of authority, duties and responsibilities for carbon footprint evaluation

3.1 Promote and support employees in resource management from the process of acquiring raw materials until decomposition with understanding to enhance awareness and awareness of effective corporate management together towards achieving the maximum benefit.

3.2 Employees in the relevant departments are responsible for collecting information, including evidence, regarding emission and absorption of greenhouse gases related to the organization's activities for further use in evaluating and preparing annual report.

This Carbon Footprint for Organization Policy has been considered and approved by the Board of Directors' Meeting No. 6/2021 on 17 December 2021 and is effective immediately.
